# NSR

FOR THE NATURE

The climate change we are experiencing is presenting us with tragic scenarios that we cannot remain indifferent to.

NSR is constantly committed to the protection and respect for the environment. The entire energy needs of the company are managed through photovoltaic panels installed on the roof of the facility, producing 100,000 KW of green energy per year.

The machinery inside the facility is state-of-the-art, with low energy consumption and low environmental impact. Most of the components produced are made from recycled plastic, as well as the paper and cardboard used for packaging. The exhaust gases from production are regularly monitored and released into the environment through careful filtering systems to comply with the latest environmental impact and personnel safety standards. Living on this planet is our right; protecting it is our duty!
